

MAPS

WATER WEEK IN KENTUCKY

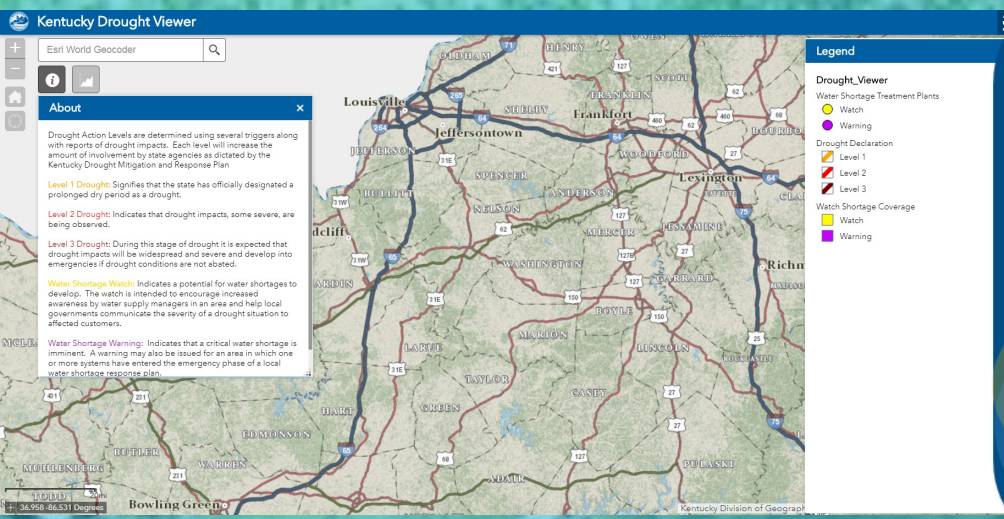

Water Maps Portal

Click on the maps to access data on water health, droughts, harmful algal blooms, and flood risk through the Division of Water’s [Water Maps Portal](#)

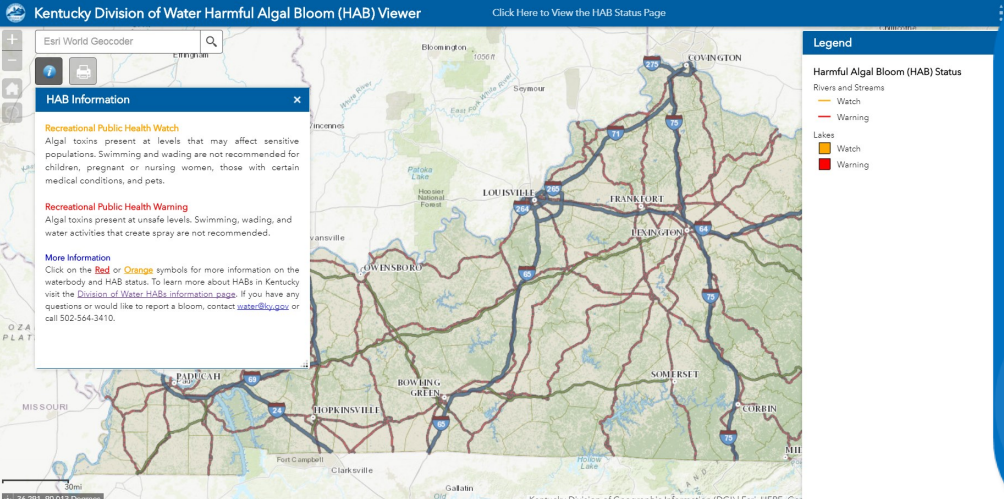

KY Water Health Portal

The Kentucky Water Health Portal is a clickable map that allows you to locate your stream and see if the KY Division of water has data about water quality there and if there are any impairments or warnings associated with the waterbody. Follow the [link](#) to explore the map!

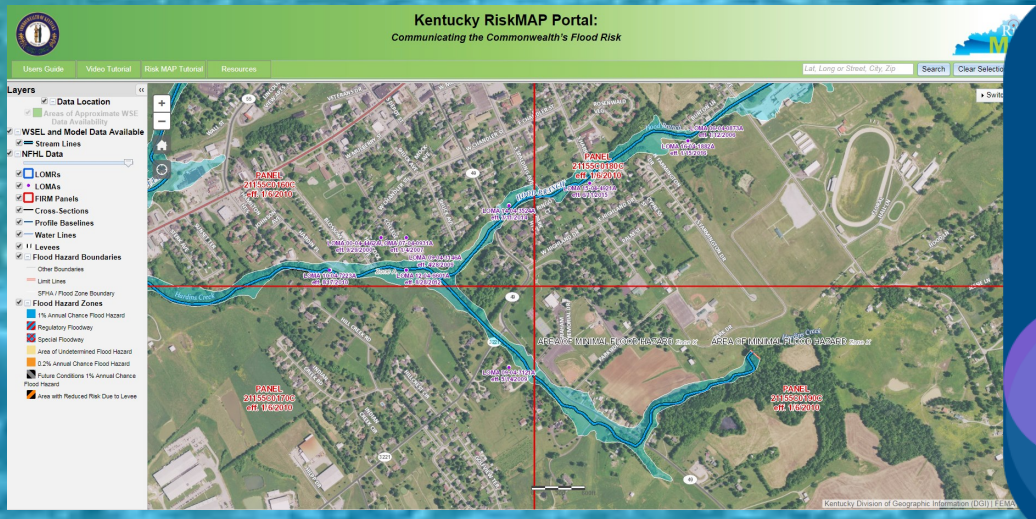

KY Drought Viewer

The Drought Viewer allows the public to see current drought conditions by county, and provides detailed information on the severity of drought conditions. Learn where there are Water Shortage Watches and Warnings in the state.

KY Harmful Algal Bloom Viewer

The Kentucky Harmful Algal Bloom (HAB) Viewer provides the latest information on the status of HAB recreational health advisories in the Commonwealth. Advisories are based on potential public health risks from algal toxins found in Kentucky's lakes and rivers.

Risk Map Portal

The Risk Map Portal provides a source for all of the Commonwealth's floodplains. Use this application to view the floodplains throughout the State. In selected counties, you can also download the floodplain models.
